

Refrigerant Leak Detector AR5750A

- Specification:**
 - *Detect item: All type of halogenated gas
 - *Intensity of the leakage level
 - *Rapid warm up time: Within 90s
 - *The flexible probe can easily access any areas
 - *Use the high effective mechanical pump to decrease the reactive time.
 - *Ultimate sensitivity: 5AEJ1607 level standard, 0.5oz per year
 - *Continuous operation time: 4hours

SPECIFICATIONS	
Warm up Period	< 110 sec
Sensitivity	≤5PPM
Alarm Indication	LED light
Response Time	≤1 sec
Measurement Gas	Inflammable gas, refrigerant, halogen gas, and so on
Sensitivity adjustable	√
Low Battery Indication	√
Sensor	Semiconductor
Operating Temperature	0~50°C
Continuous Operation Time	6 hours
Analog Quantity Indication	√(LED)
Auto Power off	√
