

### testo 410-1

#### testo 410-1; vane anemometer with built-in NTC air thermometer, incl protective cap, batteries and calibration protocol

testo 410-1 measures air speed and temperature. It is ideal for quick spot checks at air outlets on account of its integrated measurement with the 40mm vane. Timed mean calculation is possible. In addition to air speed and temperature, testo 410-2 also measures air moisture. Testo's very own, patented humidity sensor guarantees accurate readings. In this way, air conditions can be reliably checked.

- Flow velocity measuring instrument with temperature measurement
- Integrated measurement with 40 mm vane
- Timed mean value calculation
- Hold function and max./min. values
- Windchill calculation for outside areas (perceived temperature)
- Display illumination
- Protective cap for safe storage
- Including wrist strap, belt holder and calibration protocol

#### Technical Data

#### Brochures

Storage temperature	-20 to +70 °C
Operating temperature	-10 to +50 °C
Battery type	2 batteries Type AAA
Battery life	100 h
Weight	110 g
Dimensions	133 x 46 x 25 mm

#### Probe type NTC

Meas. range	-10 to +50 °C
Accuracy	±0.5 °C
Resolution	0.1 °C

#### Probe type Vane

Meas. Range	0.4 to 20 m/s
Accuracy	±(0.2 m/s + 2% of mv)
Resolution	0.1 m/s
