

## MicroMapper™

Simple verification tester verifies wiremap and identifies faults with LEDs.

- Testing of twisted pair cables for open circuits, shorts, crossed pairs, reversed pairs and split pairs
- Easy-to-read fault display
- Tone generator for tracing installed cables hidden in walls, floors and ceilings
- Remote unit enables one-person testing of installed cables
- Specifications

### General

**Dimensions** 4.93' x 2.05' x 1.18' (125 x 52 x 30 mm)

**Weight** 0.28 lbs (130 g)

Minimum length for split pair detection is 2 ft (0.6m)

Testing twisted pair cables over 656 ft (200 m) in length

**Battery** (4) 1.5 Volt AAA Alkaline battery; low battery indication by LED
